

# Plaisted's Organic Compost Mix

60% Plaisted's Organic Compost and 40% Plaisted's Screened Soil

*Plaisted's Organic Compost Mix* can be used as replacement or as an amendment to any soil. The organic matter enriches the soil to support better plant growth and provides porosity. Better porosity makes it easier for plants to establish a good root system to grow and flourish. This compost mix also increases the ability of the soil to absorb and distribute moisture, oxygen and nutrients.

**Q:** How does *Plaisted's Organic Compost Mix* improve sandy soil?

**A:** It slows the loss of nutrients and water. This mix provides a consistent high quality growing medium that helps retain important moisture levels, while providing valuable nutrients for growth. This mix can either replace your sandy soil, or it can be added as an amendment.

**Q:** How does *Plaisted's Organic Compost Mix* improve clay soil?

**A:** This mix allows water and air to infiltrate, allowing excess water to drain, thereby creating just the right soil porosity. It will keep the soil loose. You can either replace the clay soil with this mix, or use it as an amendment.

# Plaisted's Organic Compost Mix

*Plaisted's Organic Compost Mix* is composed of organic compost, pulverized topsoil and uses the **Accublender™** to create this mix for a consistent product.

## Delivery Options

### *We deliver!*

- Our fleet of 40 trucks can deliver one yard to 45 yards per load.
- Or, come in with your own vehicle and our friendly staff will load the product for you.

### Plaisted's **Accublender™**

Plaisted Companies' four-bin **Accublender™** has been used to create this product. This unique blender has an on-board screen deck that removes oversized particles and a mechanical paddle wheel that insures uniformity. The **Accublender™** automatically adjusts for flow rates of material and will stop the conveyor belt when feed bins run out of material. The **Accublender™** assures a consistent and accurate product... load after load.
