

Plaisted's Premium Garden Mix

This is the best premium garden mix on the market today. The mix can be used as a replacement or as an amendment to existing soil. Healthy fertile soil is a mixture of water, air, minerals and organic matter. One of the best ways to improve soil fertility is to add organic matter. Successful gardening and plant growth depends on good soil. **Plaisted's Premium Garden Mix** adds organic matter that improves all attributes of the soil.

Four ingredients in **Plaisted's Premium Garden Mix** work together to provide optimum growing conditions.

- **Plaisted's Organic Compost** provides porosity and loosens the soil and helps retain nutrients.
- Peat, Inc. **Coarse Fibrous Peat** increases the soil's water holding capacity which benefits the root system.
- **Plaisted's Screened Soil** is high quality, uniformly consistent and increases cation exchange capacity.
- **Plaisted's Coarse Sand** is added to provide better porosity for proper water drainage and air space.

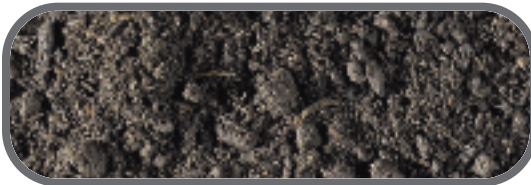

Q: How does **Plaisted's Premium Garden Mix** compare to other 1-1-1 garden mixes on the market today?

A: There really is no comparison. The common 1-1-1 mixes usually consist of soil that has some decayed peat and fine sand in it. This fine sand hinders proper water drainage and good air space. Healthy productive soil needs a good proportion of organic matter. That is why we call this product **Premium** garden mix.

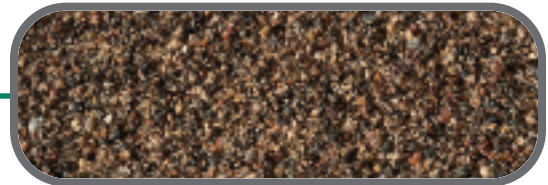

Plaisted's Premium Garden Mix

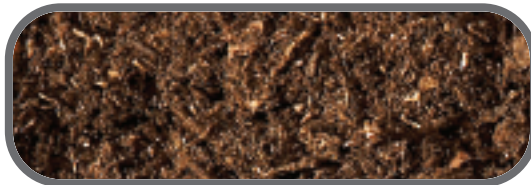

Plaisted's Premium Garden Mix is comprised of *Plaisted's Organic Compost*, Peat, Inc. *Coarse Fibrous Peat*, *Plaisted's Coarse Sand* and *Plaisted's Screened Soil*. We blend this product by using Plaisted's computerized **Accublender™** to assure a consistent product... load after load.

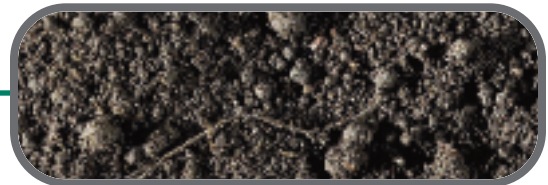

Plaisted's organic compost

Plaisted's coarse sand

Peat, Inc. coarse peat

Plaisted's screened soil

Plaisted's **Accublender™**

Plaisted Companies' four-bin **Accublender™** has been used to create this product. This unique blender has an on-board screen deck that removes oversized particles and a mechanical paddle wheel that insures uniformity. The **Accublender™** automatically adjusts for flow rates of material and will stop the conveyor belt when feed bins run out of material. The **Accublender™** assures a consistent and accurate product... load after load.

Delivery Options

We deliver!

- Our fleet of 40 trucks can deliver one yard to 45 yards per load.
- Or, come in with your own vehicle and our friendly staff will load the product for you.
